Education

Southern Connecticut State University

Graduating: Spring 2027

- Bachelor of Science in Computer Science, 4.0 GPA, President's List.
- Minor in Mathematics, inductee in P.M.E National Mathematics Honor Society.

Technical Skills and Experience

Operating Systems

- 3 years of experience with Windows machines for personal, professional, and scholastic use.
- Currently using a macOS machine for personal, professional, and scholastic use.
- 1.5 years of experience with Linux and WSL for personal and scholastic projects.

Software Familiarity

- Worked extensively within the Office 365 suite.
- Installed open-source software, programming languages, and guest operating systems.
- Resolved merge conflicts in Git/GitHub for group projects.

Technical Support

- Set up and configured network connectivity for various devices.
- Set up peripherals such as printers, keyboards, mice, and flash drives.
- Troubleshoot system, network, and application issues through terminal commands.

Work Experience

Research Assistant (Michigan State University)

May 2026 - July 2026

- Provided coding and software expertise for a research project in quantum topology.
- Utilized the High-Performance Computing Center at MSU for intensive computational tasks.
- Worked within macOS, Windows, and Linux ecosystems.

Course-based Tutoring (CASAS at SCSU)

September 2024 - May 2026

- Led one-on-one tutoring sessions covering basic to advanced topics in CS and math.
- Facilitated an environment that prioritizes clear communication, patience, and inclusion.

Restaurant Staff (Nana's Byrek in Waterford, CT)

June 2022 - August 2024

- Worked with customers in-person and over the phone as they placed, picked up, and paid for orders.
- Handled customer feedback, and mistakes made in fulfilling orders.

Relevant Coursework

Operating Systems, A+

Spring 2026

- Covered topics including application, memory, file, and device management.
- Studied details of current Windows, macOS, and Linux distributions.

Distributed and Parallel Systems, A+

Spring 2026

- Covered topics including virtual machines, cluster computing, and cloud computing.
- Used Linux, VirtualBox, and network management software for projects.

Computer Networking and Security, A+

Fall 2025

- Covered network and security protocol foundations for wired and wireless networks.
 - Completed laboratory-based networking exercises using Wireshark and Cisco Packet Tracer.
-
